

## Birdwatching

My name is \_\_\_\_\_

We have a wide variety of bird species for you to spot...

These are just some of the most commonly seen birds found here at the Mackay Regional Botanic Gardens. The Mackay Branch of the Birdlife Australia has recorded over 100 different species of birds on and around the Lagoons and throughout the Botanic Gardens.

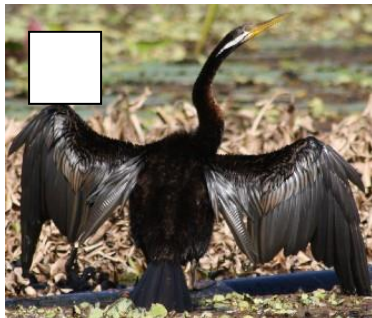

How many of these birds can you spot?

Australasian Figbird

Dusky Moor Hen

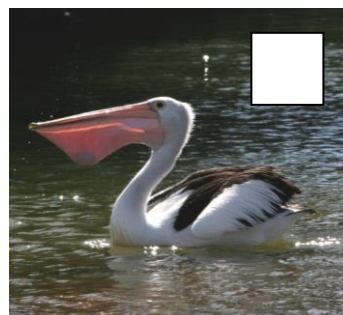

Australasian Darter

Magpie Geese

Egret

Pelican

Purple Breasted Swamphens

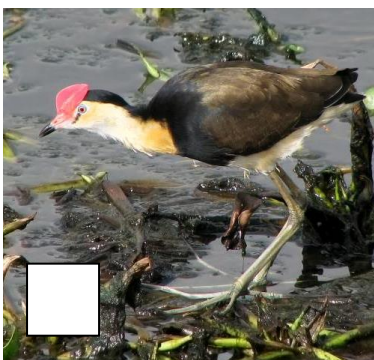

Laughing Kookaburra

Rainbow Lorikeet

Masked Lapwing

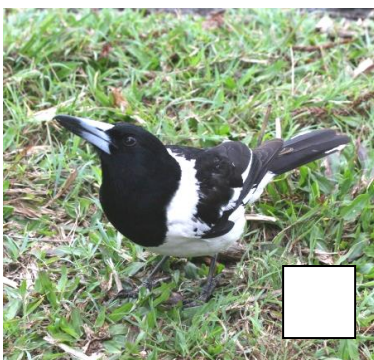

Comb-crested Jacanica

Olive-backed Sunbird

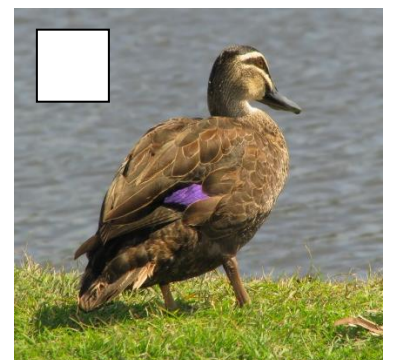

Willie Wagtail

Pied Butcher Bird

Forest Kingfisher

Pacific Black Duck

## Look and enjoy... ... but please don't feed!!!

Feeding birds... bread, cake and scraps causes disease, pollutes the environment and creates aggressive behaviour. Birds have a natural diet and human food can make them sick.

Plumed Whistling-Ducks
