

1

*Banksia integrifolia* (1) - Let's start at the very beginning with our own botanic voyagers, Banks and Solander. Who put the 'Banks' in *Banksia integrifolia*? I am one of the scientists who collected many plants whilst the HMB Endeavour travelled Australia's east coast. I am very lucky to have a whole plant genus named after me.

My name starts with J \_\_\_\_\_ B \_\_\_\_\_. Who am I?

2

Into the Tropics with the Tropical Shade Garden... *Callicarpa pendunculata* (3) – I am growing in the Tropical Shade Garden on the left side and I am one of the many plants that was collected by Banks and Solander. My fruits are lots of tiny berries. What colour are my berries? P \_\_\_\_\_.

Am I a local native plant? (Hint – ask mum and dad on the self guided walk trail. Yes/ No

3

*Lomandra banksii* (4) – I was collected very early by Banks and Solander and have small pretty flowers that look a bit like a poached egg! What colours might my flowers be made of W \_\_\_\_\_ and Y \_\_\_\_\_.

4

*Morinda citrifolia* (6) – When I have fruits on me, you will smell me before you see me! I give off a smell like rotten cheese some people say..I am another that was collected by those famous pair, Banks and Solander. What is my plant name?

C \_\_\_\_\_ F \_\_\_\_\_ T \_\_\_\_\_.

5

*Dillenia alata* (8) – As you can start to see, all these plants were part of the Banks and Solander collection! What am I? I have deep red bark, green leaves and my flowers are bright yellow, a bit like the colour of the sun when you draw me on paper. I have a deep red colour in the centre of my flower...you will find sand and sea salt when you visit the second word in my name. I am known as the R \_ \_ B \_ \_ \_ \_ \_.

6

*Hoya australis subsp. australis* (9) – I am the creeping vine that is growing over the cage of the garden next to the Café...I have a pretty white flower and my leaves are quite hard so I don't lose lots of water when its hot. What is the second word in my common name? The word starts with W \_ \_.

7

*Olea paninulata* (12) - I am related to the olives that you can eat. Look on the ground and on my plant o see if you can find any of my fruit. I

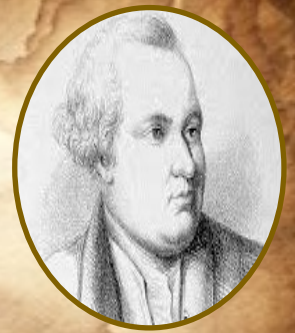

am known as the N \_\_\_\_\_ O \_\_\_\_\_.

8

*Melastoma malabathricum* (12) – I am sometimes known as a special plant collected by Banks..I have pretty coloured flowers which are coloured p \_\_\_\_\_.

# EPIC VOYAGERS

## ADVENTURE HUNT 1

Ahoy there!

Are you ready to explore the gardens and learn about each of the items on the list on the back page by using this map as your guide?
